Military Space Heaters

[The Space-Barracks Heater,](#)

The Space-Barracks Heater, is individually packed, self contained, and produces from **20,000 to 60,000 BTU** (adjustable output control) from a 19"W X 35"H X 22.5"D , 88 lb. unit (100 lb. with the stack assembly, and boxed). It includes the fail-safe, nonflooding vaporizing burner

which is controlled by adjusting an attached fuel control valve.

This heater is designed for use with DF1, DF2, DFA, JP8, JetA1, and Kerosene.

[The Space-Barracks Heater is supplied with the following](#)

- Connections for 5 gallon Jerry can
- Connections for external fuel supply
- Stack Assembly and elbow
- Raincap with guylines
- Siphon priming bulb and Primer cup
- Fuel supply hose and vent hose
- Fuel Control Valve
- Basic operating instructions
- Attached

[Request More Information](#)[Print Product Page](#)

Spill Pan (19" x 22.5")

Optional accessories:

- Jerry fuel can • Fuel can stand (for external fuel source).
- Gravity feed adapter (for external fuel source). • Fuel supply hose (for external fuel source).

The Mini-Heater, (SHS)

Is individually packed, self contained, and produces **12,000 BTU** from a compact,

11.5" W X 14" H X 17.5

lightweight, 32 lbs., unit.

It includes the failsafe Non-flooding vaporizing burner Which is controlled by adjusting the height of the carburetor.

Designed for use with:

DF1, DF2, DFA, JP8, JetA1, JetB and Kerosene

The Mini-Heater comes supplied with the following:

- 1 US gallon fuel tank • Connections for 5 gallon Jerry can

- 5 foot length overflow hose and fittings • 6 foot stainless steel telescoping stack
- Raincap with guylines • Primer bulb • Pot holding brackets
- Instruction plate • Technical Manual • Attached Spill Pan (11.5" x 17.5")

OPTIONAL ACCESSORIES

- Fuel supply hose • Fuel can stand • Gravity feed adapter • Fuel Can (Jerry Can)

The Space Heater Arctic (SHA)

It comes individually packed, self contained, and produces 23,000 BTU from a 9" W X 17" H X 17.5" D , 41 lb. unit.

It includes the failsafe, non-flooding vaporizing burner which is controlled by adjusting an attached **tri-viscosity fuel control valve**.

It is designed for use with,

DF1, DF2, DFA, JP8, JetA1, and Kerosene

The SHA Heater is supplied with the following:

- Connections for 5 gallon Jerry can • 8 foot Stack Assembly•

Raincap with guylines

• Primer cup • Gravity feed adapter • Fuel supply hose and vent hose

• Fuel Control Valve • Wire grate for solid fuel • Technical Manual

OPTIONAL ACCESSORIES

1. • Fuel can stand
2. • Fuel Can (Jerry Can)

The Modern Burner Unit (MBU)

Is the replacement for the M2 gasoline burner currently used in all army field feeding systems.

Compatibility of the MBU with all current field feeding equipment will be achieved by maintaining the **same footprint and heat transfer as the M2.**

The MBU is currently in production and being fielded Army wide.

Please contact Exploration Tents by using our "[CONTACT US PAGE](#)"

the first time and you will be provided our E-Mail address at that time,

Thank you.
